WARNING!

Prior to handling any firearm be sure that the weapon is cleared and is safe to work with. Additionally, if at any time you do not feel confident in doing the installation of any PMM product, PMM recommends you contact a Licensed Gunsmith for assistance.

Kit Components:

1. 1x PMM MOE QD sling mount
2. 1x PMM MOE QD Backing Plate
   1x .1oz Loctite 242 Blue
   1x 3mm Allen Bolt
   2x 3x5mm Allen bolts
   2x 3x6mm Allen Bolts

1. Installation of PMM MOE QD mount

Remove the Magpul MOE handguard from the rile per Magpuls instructions. Place the two supplied M3x5mm Allen bolts with a little of the supplied loctite 242 into the backing plate arm of the PMM MOE QD Mount and line up the mounting holes. Lightly begin to thread them into the PMM MOE QD Mount making sure they are not cross threading and the two components are aligning correctly then snug them down. Image # 1.

Make sure both theM3 bolts are secure and the PMM MOE QD Mount is fitting snug on the handguard and has no significant movement.

Reassemble the rifle.

If mounting the PMM MOE QD Mount on the bottom of the Handguard, PMM recommends using the two supplied M3x6mm Bolts as they are longer and will have more thread engagement because of the heat shield.

Image #1
Final Note: Based on initial testing, the PMM MOE QD. should fit ALL MOE Wquipped weapon systems. If for any reason you are having issues with fitment please to contact me through one of the options below. DO NOT FORCE THE FIT OF ANY PMM COMPONENT ONTO YOUR RIFLE!
